Do you need interactive palaeogeographical map interpretations based upon high quality data?

Cambridge Carbonates Ltd announces that ArcGIS shapefiles are now available for the 52 palaeogeography maps that are used in their Northern Iraq Report. They may be purchased as stand-alone shapefiles or with the complimentary annotated PDFs of each palaeogeography.

These maps can be projected and customised to your company's needs and ArcGIS standards.

Maps are available fully annotated or as simple polygons

Cambridge Carbonates Ltd

*Expertise in carbonate and evaporite systems*
